# Downloading-Installing RDS10 to a MAC Computer

- *Mac OS Version must be MOJAVE 10.14 or Higher*

2. From the MAC, go to the App store and search for **Microsoft Remote Desktop 10**

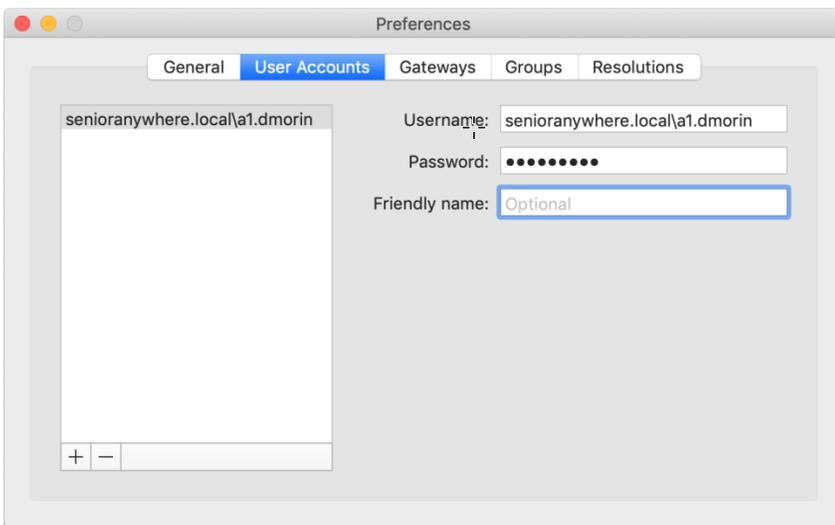

3. Once downloaded, click on **Add Workspace** to add the new connection to the Ascendance software.

4. Enter the URL **https://access.senior-anywhere.com**

5. At the User account field select the Add User Account option

6. Select Add

7. The User Name should be entered as: **senioranywhere.local\XX.username**

Password is the one used to access the modules currently.

8. Click Add, the Workspace will Appear again, click Add.

At this point, the process should connect to the new Senior Systems server, and the Workspace will become populated with the modules to which you have access, as well as any support tools.

For the purposes of exporting documents from Ascendance, you will need to set up a "redirected folder" to add them to.

From the Workspace main page:

1. Click the Gear Icon

2. Select the Preferences menu option

   At the bottom of the screen, there is an option to select a folder to which ANY of your Ascendance exports will be redirected.

3. Use the navigation drop list to select a folder.
